## TECHNOLOGY SKILLS

*Programming Languages:*

- C, C++, Python, Java, JavaScript

*Web Frontend / Backend Technologies:*

- HTML, CSS / PHP, MySQL, Java

## EDUCATION

Computer Science, Oregon State University

2017 - Present

- Degree: Bachelor of Science
- GPA: 3.48
- Expected Graduation: June 2021

## EXPERIENCE

*Software Intern*

June 2019 - September 2019

Apparent Inc., Novato, California

- Combined results from the overnight automated testing and calculated the success of the tests using Python.
- Added new features to Apparent's website that displays more information stored in the database using PHP and JavaScript.
- Peer reviewed and tested code for Apparent's website to confirm the database was communicating properly with the remote computers.

*Software Intern*

June 2018 - September 2018

Apparent Inc., Novato, California

- Improved the overnight automated tests by automatically switching Git branches to test multiple branches in a night using Python.
- Analyzed the results from the overnight automated testing to determine the timestamp and severity of the issues.
- Researched and implemented automation testing for the company's website using the Katalon software tool.

## PROJECTS

*Rocket Team, Oregon State University*

September 2018 - February 2019

- Researched ways to create 3d images of the parts used on the rocket using JavaScript.
- Tested the detection capabilities of a program connected to a camera to locate a square drawn onto a piece of paper.

## PERSONAL SKILLS

- Time management
- Problem-solving
- Communication
- Teamwork
- Communication
